Quik Fill[®] PourPaks[™]

Another
Great
Addition!

When you want the convenience and simplicity of a premeasured packet, plus the performance of a professional-strength cleaning product, you need *Quik Fill PourPaks*.

- **Portability provides labor savings.**
Quik Fill PourPaks can be mixed right at the work site so custodians don't waste time returning to supply areas to refill spray bottles or mop buckets. This mobility promotes labor efficiencies, which translates into cost savings!
- **Proper dilution minimizes waste and improves performance.**
Each pouch contains enough concentrated product to fill a 32-oz. spray bottle, a 2-gallon mop bucket, or a 4-gallon bucket. No expensive over waste, no poor results due to under usage.
- **Simplified packaging minimizes disposal hassles.**
The small *Quik Fill PourPaks* require no special disposal. And the corrugated shipping carton can be recycled with other paper products.
- **Employee training made easy.**
A combination of color-coded labeling, pictorials, and simple use instructions make *Quik Fill PourPaks* easy enough for virtually any employee to use. One pouch, one container. It's that easy.
- **Improved safety.**
No slippery spills from glug-glug gallons. Less splashing onto skin or clothing.

Pick a Pak!

We've taken our most popular *Quik Fill* concentrate products and packaged them in small, portable pouches. These are ideal for facilities where workers cannot conveniently return to janitorial closets.

PourPaks are labeled for spray bottle or mop bucket applications and are proportioned accordingly. Just pour contents into container, add water, and product is properly diluted and ready to use. Always follow product label instructions.
